Minutetaker: [Stefan Secuiu]

Agenda items

Opening by Chairperson
No minutes.

Announcements
- Marcin dropped out of the course.
- Deadlines moved to a later date. The ones from this Friday (07.04.2023) have been moved to next Tuesday (11.04.2023) and the ones from next Thursday, to next Friday.

Approval of the agenda
No agenda, Marcin was supposed to be the chairperson but dropped out and did not announce it beforehand.

Summary of action points

Action items	Who is responsible	Deadline
Card detailed view and drag and drop	Chris Obis	11.04.2023
Try to translate some logic from controllers to services (for easier testing).	Secuiu Stefan	11.04.2023
Tags	Andrei Ionita	11.04.2023
Color customization view	Tudor Coman	11.04.2023

Any questions?

- Product Pitch was over the time limit (max 10mins).
- Self-Reflection needs to outline each sub-section properly (Situation, Task, Action, Result, Reflection, Advice).
- Check feedback on Brightspace!
- Logic should to be moved into easily testable classes. We do not have to test javaFX controllers.
- Be careful with Json annotations. Read the documentation thoroughly since it might not do what you would think.
- We could, instead of having a repository of a cardlist object, have a repository of Lists of cards that is primitive.
- TA suggestion: we might refresh the board before the change is made in the repository.
- Quiz will last about 20 minutes. We should find out soon the date when we are scheduled.
- We do not specifically need to have an agenda for next week.
- Having 100% code coverage for commons and server should be pretty good already. We should try to test as much as possible but do not waste time.
- Try not to skip epics in the backlog. Some basic points from other sections in the backlog might tie in with epics from previous sections, but do not let the gap be too big between resolved epics.

Closing

Stefan will be the next chairperson.
Andrei will be the next minutetaker.
